MARSH SALDAÑA

Our Business Continuity Planning Approach is based on:

Strategic Planning

- Involve the vision, the mission, the guiding principles and the goals for the business.
- Require the ability to look at the “big picture”, recognize patterns and trends, establish priorities, anticipate issues, predict outcomes, and have strategic alternatives to engage as necessary.

Tactical Planning

- Tactical is the “hands-on” or the “doing it” part of getting the job done, to ensure the strategic plan goals are met.
- The tactics are the detailed actions needed to meet the goals or solve a problem.

What is your Business Continuity Readiness Level?

- Planning for the continuation of business operations in the event of a disaster
- Ensure that critical business activities are maintained or restored as quickly as possible
- Focused on a prioritized resumption of the most critical business functions

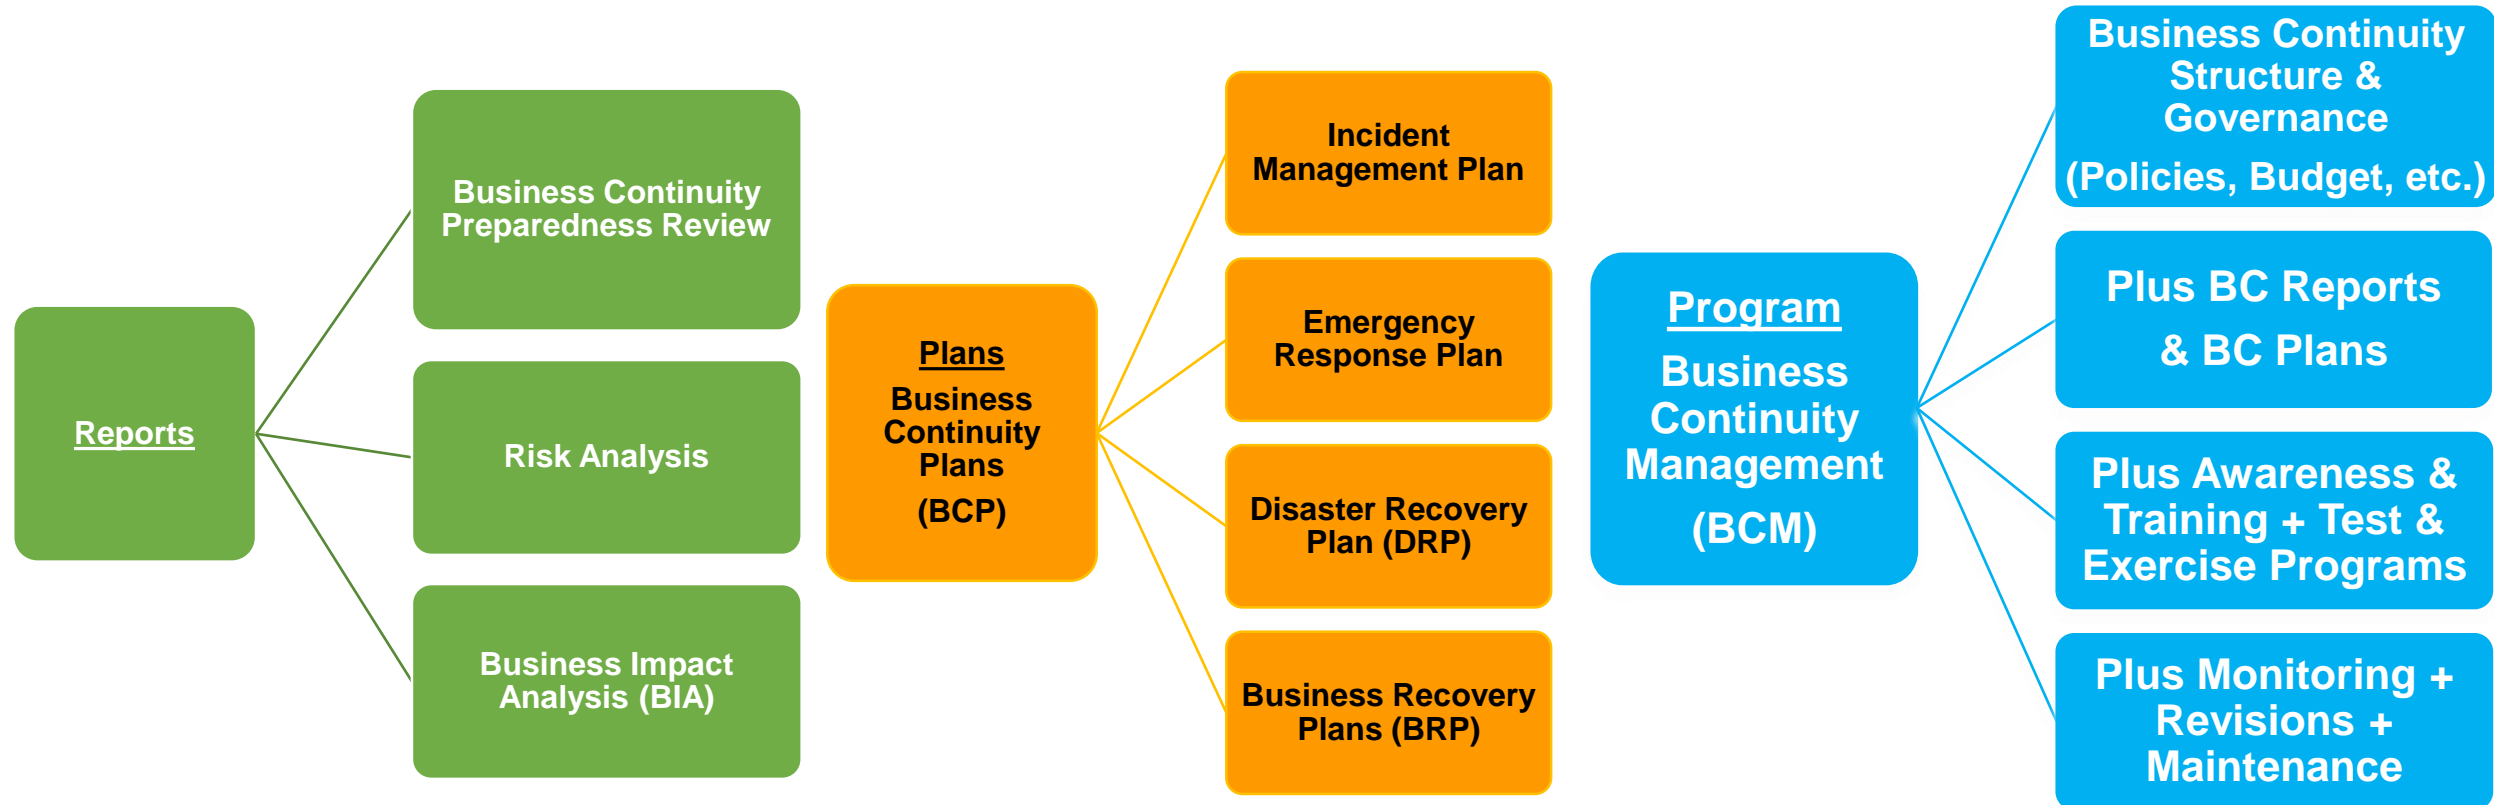

Business Continuity Management Program

Include the following plans and reports:

Business Continuity Management Program Governance			
Business Continuity Preparedness Review	Risk Analysis Risk Assessment	Business Impact Analysis	
Disaster Recovery and Business Recovery Strategies and Solutions			
Incident Management Planning
